FAQ

What are you looking for in your next role?

A highly product-focused team that works as one toward a common goal. Interested in organizations that encourage team success over individual success- "rock bands are more important than rock stars."

Where do you see yourself in the next few years?

In a contributor role where I can be highly involved in building new features and projects, writing and reviewing code, and mentoring newer team members. I have leadership experience but prefer mentoring over managing.

What languages and tools would you like to work with?

Any modern Javascript stack: Stencil.js, React.js, Angular, Vue.js, Node.js, TypeScript, etc.
